

JAMES BARTLEY

MOTION AND INTERACTIVE DESIGNER

Hello, my name is James Bartley and I recently graduated from the digital design program at Vancouver Film School where I studied motion and interactive design. I am currently interning as a 3d/Motion Designer at Firstborn Multimedia in NYC. Prior to VFS, I studied Print and Web Design earning my Bachelor's degree in Graphic Design at the Richard Stockton College of New Jersey, where I am originally from. As an up and coming designer, it was very important for me to expand my skill set beyond traditional print and web design allowing me to create compelling visual works that combine all types of media.

Over the last year, I've had the opportunity to put my passion to work and I have created some compelling projects. Some of them include:

- IBM: Worked with the firstborn motion team as an animator to create a series of motion graphics that was later turned into an online interactive experience. Software: After Effects, 3D Max, Illustrator, and Photoshop. (Firstborn)
- INVISIBLE WARS: A motion graphics website that promoted international volunteering to areas of crisis. I co-directed, co-produced, and co-created all aspects of the project from concept to development. Software: Cinema 4d, After Effects, Illustrator, Photoshop, and Flash. (Non-profit PSA, VFS)
- URBAN FANTASY: Worked in a team of four to create a two minute illustrated motion piece about a popular subgenre in film. My role in this project was to handle all character illustrations and major animations. Software: After Effects, Illustrator, and Photoshop. (VFS)

My skill set is diverse and I've taken on many different roles in media through a wide range of projects. Whatever the project is, I'm comfortable with leading or following direction. Always deadline driven and dedicated, I maintain a positive attitude regardless of the situation. I react well with change and always stay humble. My patience and attention to detail make for a great experience and my commitment to quality ensure that my projects are a success.

I am always looking for opportunities that will push me to keep growing as a designer. I love what I do and thrive off finding the correct process to bring a "Big Idea" to life.

Thank you for your time.

Sincerely,

James Bartley
Motion and Interactive Designer
